Children's Medical Ventures

Wee Sight™

Transilluminator

Item 1017920

INSTRUCTIONS FOR USE

Caution: US federal law restricts this device to sale by or on the order of a physician.

The Wee Sight™ is a portable, LED, battery-operated device that is intended to assist in locating veins in the patient's extremities.

WARNING

- LED radiation. DO NOT stare into beam. Class 2 LED product.

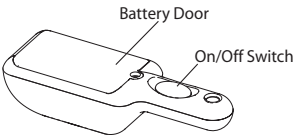
CAUTIONS

- Do not submerge the Wee Sight into liquids.
- Do not place liquids near the device.
- Do not mix battery types. For replacement, use only AA alkaline batteries.
- Do not recharge non-rechargeable batteries.

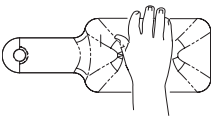
NOTES

- Discard device upon failure of an LED and/or the On/Off switch.
- Dispose of the device in accordance with local regulations.
- Clean the Wee Sight in accordance with the standard hospital protocol for cleaning.
- Replace batteries upon degradation of the device functionality.
- Batteries are the only serviceable parts. Children's Medical Ventures recommends replacing both batteries at the same time.

INSTRUCTIONS FOR USE



1. Install the batteries.
2. Press the On/Off switch on the bottom of the Wee Sight to turn the unit ON.
3. Place the Wee Sight on a flat surface or hold in your hand, then place the patient's hand, palm down, over the top of the Wee Sight and LED.
   NOTE: To improve vein location and view, tighten the skin by draping the patient's fingers over the Wee Sight.



4. Dim the room lights for better illumination.
5. Insert the IV catheter, then turn the Wee Sight OFF by pressing the On/Off switch.
